Mein landwirtschaftliches Testament

Securing Land and Resource Rights in Africa

Frauen, die letzte Kolonie

This is the third volume of the series Reinventing Social Emancipation: Towards New Manifestoes series. Another Knowledge is Possible explores the struggles against moral and cultural imperialism and neoliberal globalization that have taken place over the past few decades, and the alternatives that have emerged in countries throughout the developing world from Brazil and Colombia, to India, South Africa and Mozambique. In particular it looks at the issue of biodiversity, the confrontation between scientific and non-scientific knowledges, and the increasing difficulty experienced by great numbers of people in accessing information and scientific-technological knowledge.

**Frauen, die letzte Kolonie**

Discusses the biological, economic, and moral ramifications of "genetic imperialism"
International Labour Documentation

Interdependence of Biodiversity and Development Under Global Change

Cahiers de la Femme
Contributed articles presented earlier at an international seminar on February 10-11, 2003 at Mangalore.

The European Union in Transition

Global Forests and International Environmental Law

Transnational Asia Pacific

South Asia in a Globalising World

Cultural Memory and Biodiversity

Vandana Shiva has established herself as a leading independent thinker and voice for the South in that critically important nexus where questions of development strategy, the environment and the posititon of women in society coincide. In this new volume, she brings together her thinking on the protection of biodiversity, the implications of biotechnology, and the consequences for agriculture of the global pre-eminence of Western-style scientific knowledge. In lucid and accessible fashion, she examines the current threats to the planet's biodiversity and the environmental and human consequences of its erosion and replacement by monocultural production. She shows how the new Biodiversity Convention has been gravely undermined by a mixture of diplomatic dilution during the process of negotiation and Northern hi-tech interests making
money out of the new biotechnologies. She explains what these technologies involve and gives examples of their impact in practice. She questions their claims to improving natural species for the good of all and highlights the ethical and environmental problems posed. Underlying her arguments is the view that the North's particular approach to scientific understanding has led to a system of monoculture in agriculture - a model that is not being foisted on the South, displacing its societies' ecologically sounder, indigenous and age-old experiences of truly sustainable food cultivation, forest management and animal husbandry. This rapidly accelerating process of technology and system transfer is impoverishing huge numbers of people, disrupting the social systems that provide them with security and dignity, and will ultimately result in a sterile planet in both North and South. In a policy intervention of potentially great significance, she calls instead for a halt, at international as well as local level, to the aid and market incentives to both large-scale destruction of habitats where biodiversity thrives and the introduction of centralised, homogenous systems of cultivation.

**Gender-Studien**

**Discussion Paper**

**The Indian Forester**

**Biotechnology**

This exciting anthology emphasizes ethical issues in environmental policy while providing balanced coverage of theoretical perspectives and applied environmental topics.

**Healing Natures, Repairing Relationships**

**Menschenrechte - Frauenrechte**
The Long & Winding Road

This concise introduction to environmental science ecology and environmental biology uses basics and easily understandable scientific laws, principles, and concepts to help readers understand environmental and resource problems and the possible solutions to these problems. Contains new information on earth stories, concept mapping, 68 new color photos, 101 diagrams, 17 satellite photos, and 12 new maps. 4-color throughout.

Women in Action

Environmental Issues and Sustainable Futures

Abstracts on Sustainable Agriculture

This collection of essays is the fruit of a special project within the General Research Programme of the Canadian Council on International Law. The volume constitutes the first comprehensive analysis of the status and treatment of forests as a subject of study in the field of international law. It is hoped that the publication and dissemination of these essays will stimulate not only further study and analysis, but also appropriate international and domestic policy initiatives that will contribute to the realization of a global forests convention. The common theme of the papers is the prospect of an International Forests Convention, but the diverse and complementary perspectives offered on this prominent dénouement of UNCED also contain useful general analyses independent of the UNCED agenda.

Bibliographie internationale des recensions de la littérature savante

Beyond Evolution

This collection brings together adult education theorists and practitioners from Africa, Asia, Latin America and the Caribbean (and diaspora from these regions) in an attempt to foreground issues, concepts, theories and practices of adult education in Southern locations. Key contributions include contemporary theoretical implications of the works of Nyerere, Freire,
Confucious, Mao, Buddhism and African indigenous conceptions along with current discussion pertaining to globalization, citizenship and adult education and learning in subaltern social movements. Case studies from all regions address context-specific grounding of these theoretical and conceptual discussions, while addressing higher education, community, movement and NGO/civil society spaces of engagement.

**Agriculture and Human Values**

This new volume of the CBD Technical Series presents an analysis of the systemic character of global change, biodiversity and human development, and the relationships between them.

**Monocultures of the Mind**

Presenting emerging perspectives on environmental restoration, this collection of essays by a leading group of environmental scholars combines theoretical discussion with practical approaches. Describing the variety of ways that humans can and should interact with nature, this multi-disciplinary work shares hands-on exercises for engaging urban communities to develop supportive relationships with their surrounding environment. These writings define the paradigm of "restoration design" and the ways that its disciplines and actions can provide humans with a new direction for interrelating with the world in the 21st century.

**Biodiversity and Human Welfare**

**Transnational law & contemporary problems**

**Genescapes**

Provides a transnational perspective on some of the complex cultural effects of emerging global capitalisms and modernities in the Asia Pacific region.

**The Bangladesh Development Studies**
Another Knowledge is Possible

A comprehensive introduction to the important economic, social and political processes and development issues in this extremely popular region. South Asia provides one of the world's most challenging development contexts and The authors take a different approach to most traditional development texts, making the latest research teacher friendly and presenting material in an accessible manner for non-specialists.

Global Perspectives on Adult Education

Explores fundamental changes occurring in the circulation and ownership of scientific information.

Panjab University Law Review

This book introduces the lay reader to the ecological risks associated with transgenic organisms. Genetic engineering could make a valuable contribution within agriculture, although the initial promise of more abundant food, produced in an environmentally friendly manner, is not being fulfilled. Instead the technology is being promoted at the expense of sustainable alternatives that have fewer environmental and social costs.

"Hängt die Grünen!"

Property Rights and Biodiversity Management in Kenya

Intellectual Property Protection in Africa

This guide seeks to sort the flood of information written about environmental issues and sustainable societies in recent years and order it in some way. A total of 450 document abstracts are presented here, most of which are on books and think tank reports. These items first appeared in "Future Survey" (journal) and were published between 1991 and 1995. Many of these items focus on American issues; however, in most instances, both the problems and the proposed remedies may be of great
relevance to other countries. The abstracts are grouped into three broad categories: (1) "Environmental Issues," in which the primary focus is on a particular problem or set of problems; (2) "Toward Sustainability," where the primary focus is on a sustainable society or some key aspect of it; and (3) "Politics and Planning," in which the focus is on political context, environmental critics, environmentalist groups, and actions to be taken at the global, national, regional, and local levels. A total of 170 periodicals related to the environment are also identified including two dozen general-interest publications, four dozen publications with an environmental focus, and 100 specialized environmental publications such as those devoted to soil conservation, waste disposal, environmental education or environmental politics. A publisher/title index and a subject index are also included. (PVD)

She shows that memory banking offers significant benefits for local populations - not only the preservation of traditional knowledge but also the maintenance of alternatives to large-scale agricultural development and commercialization. She also compares alternative forms of germplasm conservation conducted by a male-dominated hierarchy with those of an informal network of migrant women.
